## SHREWSBURY TOWN COUNCIL

## ASSET DISPOSAL POLICY

#### **AIMS OF POLICY**

The purpose of this policy is to lay out the requirements for disposing of Town Council assets under a comprehensive framework and to ensure that the Town Council obtains the best value in the disposal in any of its assets.

Asset management stresses full lifecycle management from procurement to disposal.

#### **Policy Objectives:**

- To facilitate the overall management of risk for all capitalised equipment, land, buildings and software for the organisation
- To improve asset utilisation, identify and remove problem assets and those assets which are dormant avoiding redundant maintenance and warranty coverage
- To generate and maintain an accurate and current Asset Register of all equipment and software
- To ensure the organisation fulfils its legal, statutory and audit requirements in relation to capitalised equipment and software.
- To provide appropriate management information in relation to capitalised equipment and software.

#### **REGISTRATION OF ASSETS**

An Asset Register will be generated and maintained by the RFO. This Register will include all capitalised equipment and software with a purchase or revaluation value of £5,000 and above, including collection items that in total equal or exceed £5,000.

The Asset Register will be available to all staff with detailed access provided for those with purchasing or local management responsibilities.

A single process will, as far as possible, be employed for the procurement, maintenance and disposal of all capitalised equipment and software. The process and procedures in relation to the life-cycle of equipment is outlined in the policy statements of the annual accounts which are compiled in compliance with current financial regulations. These processes will assist the organisation to:

- Ensure assets are subject to the appropriate disposal processes which abide by all legal, statutory or audit requirements.
- Ensure that design specifications for equipment are directly linked to business requirements and address the entire lifecycle.
- Reduce over-provisioning of equipment and software.

If fixed assets are stolen or destroyed the Asset Register should be updated and a record kept to indicate if an insurance claim has been made of a stolen item has been reported to the Police.

#### **DISPOSAL OF ASSETS**

Organisations that dispose of capital assets and redundant or excess stock/property need to ensure they have clearly set out processes to ensure that the disposal of unwanted resources takes place in a transparent and accountable manner.

Disposals should be carefully planned and conducted so that they maximise value for money for the Council and minimise opportunities for exploitation by individual employees, private persons or organisations.

The Town Clerk is responsible for ensuring that this policy is followed.

Assets include but may not be limited to, physical property, plant and equipment, furniture and fittings, vehicles, intellectual property, data and information.

Disposal includes the sale, scrapping, write-off, barter, trading or any other means of ceasing beneficial ownership or custody of assets.

Write off specifically refers to the removal of an asset from the Council asset register, or Statement of Financial Position, at nil value.

#### **PRINCIPLES**

Assets will be disposed of in a manner that ensures the Council achieves the best net value of the asset.

Disposals will be conducted in an efficient, effective and transparent manner.

All asset disposals will be appropriately authorised according to the table below and adequately documented in the Asset Disposal Folder.

Authoriser	Land	Fixed Assets
Head of Operations	n/a	£0 - £10,000
Town Clerk	n/a	£10,001 - £50,000
Town Council	All	Over £50,000

Disposal processes will ensure that assets that are sold or scrapped are removed appropriately from the asset register and financial records and will facilitate appropriate stewardship of assets.

Council Officers and Members must not be advantaged over members of the public.

At no time will any assets be disposed of directly to Officers and/or Members. Officers and/or Members may purchase an asset in an open tender process provided they have no decision making involvement in the disposal process.

All disposals of assets will be through an open, fair and transparent process.

Independent appraisals of value will be obtained for higher value assets prior to their disposal as set out in the procedures.

There will be occasions where assets have only a nominal value and are obsolete to the Council, but may be of use to another organisation e.g. a charity. In these instances the Town Clerk will take a report to the Finance and General Purposes Committee to seek approval for disposal outside the normal scope of this policy.

Appropriate due diligence is needed to comply with any endowments or covenants on land/property.

The town Council must determine a clear and robust disposal strategy for each asset to be disposed of including the following:

- Due diligence
- Timing
- Value of disposal

- Marketing and advertising avenues
- Most appropriate disposal option.

# A. POLICY AND PROCEDURE FOR THE DISPOSAL/CHANGE OF USE OF TOWN COUNCIL LAND/PROPERTY

#### **DUE DILIGENCE**

The Town Clerk shall be responsible to carry out early due diligence to assess the likelihood of a business case for disposal or change of use.

The business case (APPENDIX A) will be based upon the following principles:

Land/property will be deemed surplus to the Council's requirements where:

- it makes no contribution to the delivery of the Town Council's services, strategic or corporate objectives; OR an alternative site or method of delivery has been identified which would be more cost effective in delivering the Town Council's services, strategic or corporate objectives;
- it has no potential for strategic or regeneration/redevelopment purposes in the near future;
- it will not contribute to the provision of a sustainable pattern of development through a lack of fitness for purpose, cost of maintenance, lack of accessibility, poor location or similar reason;
- it makes no significant contribution to protecting and enhancing the natural, built and historic environment, including making minimal contribution to helping to improve biodiversity.
- cost of maintaining the land/property is greater than the benefit of retaining the asset.

The review must examine whether there are any covenants on the use of any land proposed for disposal or any change of use inhibits future use or value.

The review must examine whether the provisions of Section 123 of the Local Government Act 1972 apply. The Due Diligence Checklist (APPENDIX B) must be completed after an in principle decision to dispose of the asset by Full Council.

#### **TIMING**

The timing of any marketing/disposal will need to be considered against the background of:

- the current market conditions
- potential for the site value to increase in the future
- whether there is a need to raise capital receipts
- the current planning processes.

#### **VALUATION OF THE LAND/PROPERTY**

At least two external independent valuations of the land/property shall be obtained before disposal is considered.

The terms of sale of land/property should include any clauses relating to a share of profits from a future sale of the asset.

#### **SALE PROCEEDS**

Any sale proceeds less selling costs for land/property must be recorded separately in the Town Council's financial records.

Funds will be allocated to the Usable Capital Receipts Fund.

## OPTIONS FOR DISPOSAL OF THE LAND/PROPERTY

## **Disposal Options**

Formal Tender	The sale of land/property by process of public advert and sealed bids
	submitted by a given date. These must be opened in the presence of at least
	two members of the Senior Management Team.
Sale by Agent	The land/property is made available for sale via a real estate agent.
Public auction	The land/property is publicly advertised and a binding legal agreement is
	created upon the acceptance of a bid by the auctioneer. The justification
	for the sale by this route must be recorded in writing.
Negotiated Tender	The land/property is advertised publically requesting informal offers/bids
	that meet a given specification and a set of objectives. The Town Clerk may
	then negotiate further or more detailed terms.
Sale by Treaty	The land/property is negotiated with one/a small number of interested
	parties through a direct approach from an individual through a marketing
	exercise. There must be a robust justification to proceed via this route eg.
	- the land is relatively small in size and an adjoining or closely located
	landowner is the only potential/likely purchaser
	- The nature of Town Council land and that of surrounding land
	ownership is such that the land must be sold to adjoining or
	surrounding land owners if best consideration is to be obtained.

#### B. POLICY AND PROCEDURE FOR THE DISPOSAL OF FIXED ASSETS

#### **GENERAL PRINCIPLES**

Assets will have been procured for Town Council/public benefit for use over a multi-year period and it is important that the assets should be maintained and insured during their period of tenure. The Town Council should not continue to hold assets that are no longer useful as they will still continue to have a cost in terms of maintenance and insurance.

Surplus assets that are no longer required by the Town Council should be either:

- Disposed of via sale or by being destroyed
- Designated as investment assets and held on the balance sheet for future purposes.

A Fixed Asset Disposal form (APPENDIX C) must be completed.

#### **DUE DILIGENCE**

In determining if an asset is appropriate for disposal, appropriate due diligence is required.

#### **VALUATION**

The Town Council should obtain an expected value of any asset in advance of advertising by engaging an independent evaluator, the original manufacturer or consulting appropriate trade journals.

If no external data is available, the depreciated book value is to be used.

Assets must not be sold at a value less than the reserve valuation price.

## **SALE PROCEEDS**

Funds can be used towards replacement asset or allocated to the Usable Capital Receipts Fund.

#### **OPTIONS FOR DISPOSAL OF FIXED ASSETS**

Obsolete Assets	Can be scrapped subject to approval.
Obsolete Assets Viable Assets	Can be scrapped subject to approval.  Can be disposed of by redeployment or disposal:  They may be advertised for sale in a relevant trade journal with an invitation to bid for the item.  They may also be sold via public auction.  It is also acceptable for the Town Council to approach potential customers who may be interested in purchasing the asset.  At least two bids should be obtained for assets worth over £5,000. If only one bid is received, an independent valuation report should be obtained.  Care must be taken to ensure that the recipient of the asset is aware that the Town Council accepts no liability for the asset once the sale is made. Neither will the Town Council have any
	aware that the Town Council accepts no liability for the asset once the sale is made. Neither will the Town Council have any responsibility for ongoing maintenance of the asset after sale.
	Buyers are advised to inspect the asset in advance of purchase to satisfy themselves in regards to the safety and fitness for purpose of the asset.  - Machinery with high metal value may be sold as scrap or stripped down and spares retained for similar machinery and unused parts

## **SPECIFIC ASSET DISPOSAL**

IT/Data Storage	<ul> <li>The Town Council has a legal obligation to ensure all computers, IT equipment and data storage is disposed of appropriately and legally in line with GDPR and legislation and software licence restrictions.</li> <li>The removal and destruction of data prior to disposal is the responsibility of the Town Council's Data Controller.</li> <li>Removal of software prior to disposal is the responsibility of the</li> </ul>
	Responsible Financial Officer.
Motor Vehicles	The Responsible Financial Officer must notify the DVLA.
